Somerset is located on the C. S. R. R. and is a progressive and prosperous town of 3,500. Two Banks, showing a capital stock of \$180,000, splendid Public Schools and other enterprises and institutions make her future exceedingly bright. H. Haerlin, the Great landscape artist, is about through the survey for a route of a street railway through the city, which will be operated either by steam or electricity. A complete system of water works, with resorvoir, on Crescent Hill will be immediately constructed. The minerals in Pulaski county are noted for their purity and inexhaustible supply. The superior quality of sand and several oil wells are attracting the attention of wide-awake men and it will not be long till a glass factory and an oil refinery will be put into operation. The railroad facilities of Somerset are first-class. Eight passenger trains pass daily and being half way between Cincinnati and Chattanooga, it is the business point of the head officials of the Railroad Company, who will co-operate in the further development of the wonderful natural resources the grand county of Pulaski possesses. The Cincinnati, Alabama & Atlantic R. R. is now an assured fact, and passing as it will through Somerset, adds another to her many advantages.

MR. CHARLES GREEN, of Louisville, is going to have a tough time in his canvass for Auditor. He was assistant under Auditor Hewitt for eight years and it was his especial duty to make settlements with Treasurer Tate and he did make most of them monthly and biennial. Two months after he left the office Tate skipped out and his accounts showed that his defalcation had run through a number of years. Mr. Green did not discover anything wrong; if he did he never said anything about it, and the question will arise, if he didn't, why didn't he if he is worthy to be called an accountant at all? Even if Mr. Green can explain, we believe the people will want a new deal, and so believing we have nominated the Hon. R. C. Warren for Auditor and the nomination has been very flatteringly received. Hurrah for Lincoln county's entry!

THERE is still in existence a renowned old manuscript of a translation of the Bible into the original Gothic. It is written in silver, on crimson parchment, and dates back to the fifth or beginning of the sixth century. The sages are in gold. It numbers three hundred and thirty leaves, with twenty lines to a page. There are only two kinds of punctuation used throughout the volume—the period and the color.

I have taken charge et this popular hotel and intend to run it in a first class manner in every respect. It is being papered and painted from top to bottom, the bedding is being renovated and everything done to make it pleasant and comfortable for guests. KNOWLEDGE USEFUL TO STOCK BREEDERS AND FEEDERS.

Published Every Tuesday and Friday The Sheep Industry in Baldwin County, Ala. Stock Still Grazing at Large on Unfenced Pasture Lands-Grazing Tracts at One Dollar an Acre.

> The sheep industry is growing in its proportions away down here in Alabama | The following name I stallions will make the sea for several reasons. There is a large territory for sheep to feed on; large tracts of land unfenced and unused by the owners, as pasture grounds are free to stockmen. Second, the native grasses on these pine lands are green and plentiful nearly all the year round. Third, the price of southern wool, the best clip, brought twenty-six cents per pound, and the wool on these unimproved sheep averaged one dollar per head. These sheep are good breeders and the lambs are worth one dollar per head. Fourth, stockmen tell me they do not feed their sheep at all, and one observed that, as to salt, the sheep did not know what it was. Fifth. the water is pure and plentiful-the county being well watered with springs, creeks and rivers, which are clear as crystal. Sixth, here sheep bring a fair price for mutton. Only a week ago a sheep man shipped seventeen head to Mobile and he received \$3.25 per head. at the very low price of They had been sheared and the owner declared they had not been fed a single mouthful of anything. Without any ownership in the land to speak of, there are several sheep men who own from two to five and six thousand sheep at a mere nominal cost.

The county is one hundred miles long by forty wide, and will support an imvery cheap to all who wish to engage in the sheep business. There are 75,000 \$10 to Insure a Living Colt, nearly all the large tracts can be bought

Now, while the hen is sitting let preparation be made for the comfort and welfare of the chicks after they are hatched. We may still observe the old proverbial admonition in regard to "counting the chickens," but if the first trial fails there will be no time wasted if the coop has been prepared in advance, for there will be plenty of time left to "try again," and just here is another advantage gained by beginning early .- American Cultivator.

Deerfoot Farm.

Deerfoot farm, at Southboro, Mass. the summer residence of Edward Burnett, is run for profit and on business principles. It embraces 300 acres. The products of the farm are widely known for their excellence. "To produce the best" is the motto of the farm, from the Jersey calf to the gilt edge print of butter, from the sucking pig to the strip of breakfast bacon. Everything produced on the farm is made ready for the consumer, thus saving all the profits usually like the strip of the sucking all the profits usually like the strip of the saving all the profits usually like the saving and the sa sumer, thus saving all the profits usually divided with the dealer and the middle men. Two large stores are now devoted to the sale of these goods in New York

Good brood mares are a fortune on the farm. Keep all the good mares and continue to grade up, that each succeeding work and raise valuable colts, while a gelding or a male is a useless expense on the farm. When all our farms are stocked with brood mares and greater care given to breeding the better class of horses farming will be more. horses farming will be more profitable, for there is no product of the farm that sells for better money than good horses, and the brood mares work for their keep besides. - Western Agriculturist.
